RESULTS:

Based upon the exam dated 2/15/2017, this dog has been found to be free of significant observable inherited eye disease and has been issued an Eye Certification Registry Number which is valid for one year from the time of the exam. The following breeder option codes were noted:

A3: DISTICHIASIS

Breeder Options are clinical observations that may be inherited but do not represent current potential compromise of ocular comfort, vision or other ocular functions.

Findings

Distraction Index (DI): Right DI = 0.22, Left DI = 0.27.

Osteoarthritis (OA): No radiographic evidence of OA for either hip.

Cavitation/Other Findings: None.

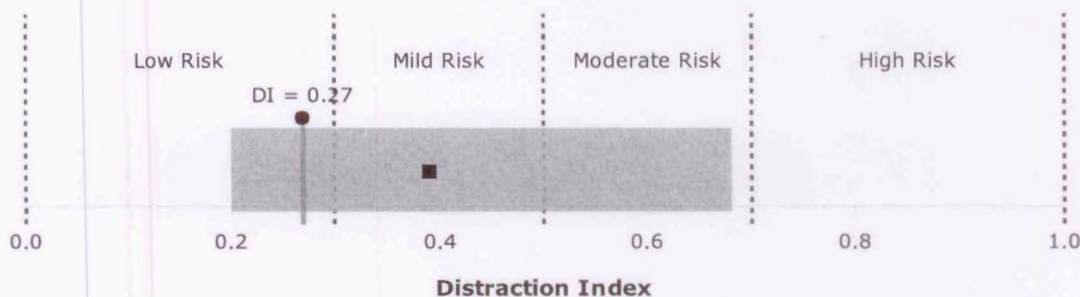

Interpretation

Distraction Index (DI): The laxity ranking is based on the hip with the greater laxity (larger DI). In this case the DI used is 0.27.

OA Risk Category: The DI is less than or equal to 0.30. This patient is at minimal risk for hip OA.

Distraction Index Chart:

BRACCO ITALIANO

Breed Statistics: This interpretation is based on a cross-section of 103 Canine patients of the BRACCO ITALIANO breed in the AIS PennHIP database. The gray strip represents the central 90% range of DIs (0.20 - 0.68) for the breed. The breed average DI is 0.39. The patient DI is the solid circle (0.27).

Summary: The degree of laxity (DI = 0.27) falls within the central 90% range of DIs for the breed. This amount of hip laxity places hip at a minimal risk to develop hip OA. No radiographic evidence of OA for either hip.
